Environmental Policy Statement

Rail Signalling & Power Ltd (RSP) is a supplier of specialist engineering products and design services to the UK Rail, Power, and Industrial Engineering sectors. The company's activities include the design, assembly, and test of electrical and electronic panels, including various types and sizes of equipment housings, and the development of value-engineered products for the railway industry.

RSP recognises the need to protect and improve our environment. We are aware that our processes of work or services may have an impact on the environment. It is our belief that RSP has a vital role to play in creating a sustainable healthy environment for everyone.

The following key environmental aims and objectives are the responsibility of all RSP employees:

1. We are committed to complying with the **Environmental Protection Act 1990** and any other relevant environmental legislation and regulation laid down by the regulatory bodies.
2. We are committed to doing whatever is necessary to minimise the risk of any type of pollution.
3. We will aim to reduce our use of energy and raw materials, especially materials that are harmful to the environment, and make maximum use of sustainable materials where possible.
4. We are committed to responsibly sourcing timber.
5. We are committed to educating, training, and motivating all persons working for or on behalf of RSP to carry out their activities in an environmentally responsible manner both in work and at home.
6. We will encourage our suppliers and customers to adopt sound environmental practices.
7. We are committed to complying with the requirements of **BS EN ISO 14001:2015 Environmental Management**, any RISQS requirements, Network Rail and Railway Group Environmental Standards, including **NR/L2/ENV/015 Environment and Social Minimum Requirements for Projects – Design and Construction** and any other relevant Environmental Standards that are laid down by relevant authorities.
8. We are committed to regular internal reviews of our environmental objectives and targets and reviews of our performance to ensure continual improvement. We aim to minimise any adverse environmental impact resulting from our activities.
9. We will undertake to dispose of any plant equipment and company products that have reached the end of their service life in line with **Waste Electrical and Electronic Equipment (WEEE) Regulations 2013** directives and any other statutory legislation applicable at the time and in a way that will minimise the environmental impact.
10. We are committed to reducing our **Greenhouse Gas (GHG) Protocol** scope 1 & 2 emissions by 5% in 2026. We will produce our scope 3 calculations in 2026.

The RSP Management Team are responsible for reviewing this policy on an annual basis. The policy will also be reviewed following any major organisational changes, if an incident/event occurs, or if a report is received that impacts upon the company's Environmental Management System.
